

# GTA HOEFLER ORNAMENTS SYMBOL SET

Adam T. Lindsay

## Introduction

This is brief documentation for the gtahoefer symbol set. It is designed for use with the GTAMacFonts distribution, available with  $\text{g}\omega\text{T}\text{E}\text{X}$  via the i-Installer.

Use of this symbol set is *not* limited to use with the Hoefler Text font, or even any of the typescripts in the type-gtamacfonts file. All it requires is that the GTAMacFonts be correctly installed, and that the symbol file is loaded. You load the file with:

```
\usesymbols[gtahoefer]
```

Within the file, there are three symbol sets available. They are documented in the following three sections.

## Hoefler Ornaments

This main set of symbols is enabled with:

```
\setupsymbolset[Hoefler Ornaments]
```

Any symbol in the set is drawn with the usual:

```
\symbol[blah]
```

...where blah is one of the following:

 	 	 	 
Hourglass	LeftHand	RightHand	BrassDashExtender
 	 	 	 
BrassDashSmooth	BrassDashDimpled	BrassDashLozenge	BorderTile1
 	 	 	 
BorderTile2	BorderTile3	BorderTile4	BorderTileSpacer
 	 	 	 
Fleuron	Fleuron2	Acorn	FleuronDark
 	 	 	 
FleuronDark2	AcornDark	Sun	Moon
 	 	 	 
Crown	FleurDeLys	SailingShip	Flourish

Some of the symbols are designed to be used together. Here are a couple examples:

```
\setupsymbolset[Hoefer Ornaments]
\startalignment[center]
\dorecurse{12}
    {\symbol[BorderTile2]\symbol[BorderTileSpacer]}%
    \symbol[BorderTile2]\crlf
\dorecurse{12}
    {\symbol[BorderTileSpacer]\symbol[BorderTile4]}%
    \symbol[BorderTileSpacer]\crlf
\dorecurse{12}
    {\symbol[BorderTile2]\symbol[BorderTileSpacer]}%
    \symbol[BorderTile2]\crlf
\stopalignment
```

```
\setupsymbolset[Hoefer Ornaments]
\startalignment[center]
\symbol[BrassDashExtender]\symbol[BrassDashExtender]%
    \symbol[BrassDashDimpled]%
\symbol[BrassDashExtender]\symbol[BrassDashExtender]
\stopalignment
```

## Hoefler Arab Borders

The second set is a specialized set of border elements, designed to be used in long rows in various combinations. Again, the set of symbols is enabled with:

```
\setupsymbolset[Hoefler Arab Borders]
```

Any symbol in the set is drawn with the usual:

```
\symbol[blah]
```

...where blah is one of the following:

   
BorderWaveHorzDownLeft

   
BorderWaveHorzUpLeft

   
BorderWaveVertDownLeft

   
BorderWaveVertUpLeft

   
BorderScrollHorzDownLeft

   
BorderScrollHorzUpLeft

   
BorderScrollVertDownLeft

   
BorderScrollVertUpLeft

   
BorderWaveHorzDownRight

   
BorderWaveHorzUpRight

   
BorderWaveVertDownRight

   
BorderWaveVertUpRight

   
BorderScrollHorzDownRight

   
BorderScrollHorzUpRight

   
BorderScrollVertDownRight

   
BorderScrollVertUpRight

## Hoefler Engraved Arab Borders

The final set is a more ornate version of the previous one. Note that the names of each symbol are identical to the above, allowing one to swap styles without changing the individual symbols. The style that is active depends on the loading of `\setupsymbolset`:

```
\setupsymbolset[Hoefler Engraved Arab Borders]
```

Any symbol in the set is drawn with the usual:

```
\symbol[blah]
```

...where `blah` is one of the following:

			
BorderWaveHorzDownLeft		BorderWaveHorzDownRight	
			
BorderWaveHorzUpLeft		BorderWaveHorzUpRight	
			
BorderWaveVertDownLeft		BorderWaveVertDownRight	
			
BorderWaveVertUpLeft		BorderWaveVertUpRight	
			
BorderScrollHorzDownLeft		BorderScrollHorzDownRight	
			
BorderScrollHorzUpLeft		BorderScrollHorzUpRight	
			
BorderScrollVertDownLeft		BorderScrollVertDownRight	
			
BorderScrollVertUpLeft		BorderScrollVertUpRight
